

HIRING PROCESS ANALYSIS

SHRISTY PANDEY

Project Description

- ◇ As the lead data analyst for the company, my responsibility is to provide detailed information about the given dataset. This involves analyzing the data thoroughly and presenting clear insights to the team. The whole data is about those people who registered for a particular post in a different department of the company.
- ◇ The dataset contains information on individuals who have registered for a specific position in various departments of the company.
- ◇ My task as a data analyst is to draw conclusions from the data by utilizing statistical methods.
- ◇ My objective is to extract insights from the data to aid the hiring department in identifying areas for improvement.
- ◇ Attributes of data
 - ◇ Application_id
 - ◇ Interview taken on
 - ◇ Status event_name
 - ◇ Department
 - ◇ Post name
 - ◇ Offered salary

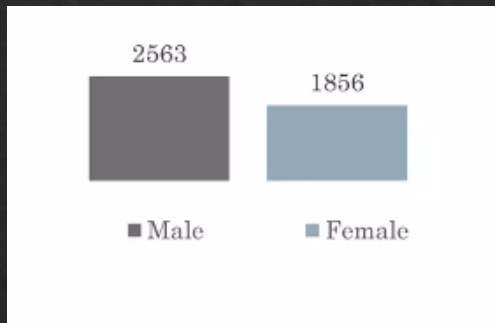

Approach

- ◆ The first step is to analyze the provided dataset, and understand the problem statement, and the given questions.
- ◆ Next, create a table using statistical tools such as minimum, maximum, and average formulas. Pivot tables and charts should also be used.
- ◆ Then, try to solve the problem step by step and create interactive graphs.
- ◆ Finally, save the Excel file in the designated folder.

Insight and Result

1- How many males and female are hired ?

2- What is the average salary offered in this company ?

| | | |
|--|----------------|----------|
| | Average salary | 49983.03 |
| | | |
| | | |

Continue...

3- Draw the class intervals for salary in the company ?

| salary slab | sum of offered salary | count of offered salary |
|--------------------|-----------------------|-------------------------|
| 0-49999 | 92457587 | 3611 |
| 50000-99999 | 264870782 | 3553 |
| 200000-249999 | 200000 | 1 |
| 300000-349999 | 300000 | 1 |
| 350000-400000 | 400000 | 1 |
| grand total | 358228369 | 7167 |
| | | |
| | | |

4- Represent different post tiers using chart/graph?
